Section 4: First-Aid Measures
Description of first aid measures

General Advice: Remove contaminated clothing
If on skin: Wash affected areas thoroughly with soap and water. If irritation develops, seek medical attention. If glass fibers become imbedded, seek medical attention
If in eyes: In case of contact with eyes, rinse immediately for at least 15 minutes with plenty of water. If eye irritation persist seek medical attention.
Section 5: Fire-Fighting Measures

Suitable extinguishing media: Water, carbon dioxide, foam
Hazards during firefighting: If product is heated above decomposition temperature, toxic vapors will be released. By products of combustion would be CO, CO₂, hydrogen cyanide, carbon particulate, hydrogen, and glass fibers.
Protective equipment for firefighting: Firefighters should be equipped with self-contained breathing apparatus and turn-out gear.

Section 6: Accidental Release Measures

Cleanup: Place into suitable container for disposal (see SDS Section 13- Disposal Considerations)

Section 7: Handling and Storage

Handling: Wear protective clothing, gloves, and eye protection
Protection against fire and explosion: No explosion proofing necessary
Storage: Avoid deposition of dust. No special precautions necessary
Storage Stability: No data available

Section 8: Exposure Controls and Personal Protection

Advice on system design: Provide local exhaust ventilation to control dust
Personal protective equipment

Respiratory protection: Wear NIOSH-certified 95 mask (or better) where adequate ventilation cannot be guaranteed, especially if cutting, sanding, and/or grinding

Hand protection: Working gloves

Eye protection: Eye protection as appropriate for method of cutting, sanding and/or grinding

General safety and hygiene measures:
Handle in accordance with good industrial hygiene and safety practice. Wear protective clothing, gloves, and eye protection. Wash soiled clothing immediately.

Boiling Point:

Flash Point:

Flammability: If exposed directly to flame
Ignition temperature: 400° F
Auto igniting: May auto ignite in temperatures over 1,000°F
Danger of explosion: Explosion may occur in areas of high concentration of airborne dust

Miscibility with water: Not Soluble

Section 10: Stability and Reactivity

Conditions to avoid:
>300° Fahrenheit
Avoid extreme heat. Avoid all sources of ignition: heat, sparks, and open flame

Hazardous reactions:
The product is chemically stable

Decomposition products:
Polyurethane:
Hazardous decomposition products: carbon monoxide, carbon dioxide, hydrogen cyanide, ether, esters, ketones

Glass Fibers:
Fiberglass alone will not burn, but smoking of the binder/sizing content of the product may occur in temperature of the environment exceeding +400° F. These same ingredients will release carbon monoxide and carbon dioxide in a sustained fire situation. Additional trace ingredient releases can occur under similar circumstances but cannot be predicted as they may vary in each situation.

Thermal decomposition:
Will decompose to a liquid at high temperatures whilst burning

Corrosion to metals:
No corrosive effect of metal

Section 11: Toxicological Information
Section 12: Ecological Information
Considered an inert solid waste. No special precautions are needed in case of a release or spill

Section 13: Waste Disposal Considerations
Waste disposal of substance:
Dispose of in a licensed facility in accordance with all government rules and regulations
